

# World malaria report 2019

4 December 2019 | Report

[Download \(7.7 MB\)](#)

## Overview

The *World malaria report 2019* provides a comprehensive update on global and regional malaria data and trends. The report tracks investments in malaria programmes and research as well as progress across all intervention areas: prevention, diagnosis, treatment, elimination and surveillance. It also includes dedicated chapters on the consequences of malaria on maternal, infant and child health, the “High Burden to High Impact” approach as well as biological threats to the fight against malaria.

The 2019 report is based on information received from more than 80 countries and areas with ongoing malaria transmission. This information is supplemented by data from national household surveys and databases held by other organizations.
